DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1, 2 and 7 9, drawn to a keyword searching using a browser, transmitting the inquiry request via the network server and displaying a form containing the search result, classified in class 707, subclass 10.
 - II. Claim 3, drawn to a keyword searching and accessing using a browser, classified in class 707, subclass 3.
 - III. Claim 4 6, drawn to filling in a form selected by a user and processing the issuing form via a document processing center, classified in class 715, subclass 505.
 - IV. Claim 10 16, drawn to a network server for transmitting the request to a document processing center, a request for inquiring, browsing, issuing or reading a document in the use of a browser, classified in class 715, subclass 513.

The inventions are distinct, each from the other because of the following reasons:

Inventions listed in Groups I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility such as follow:

Group I: A keyword searching using a browser, transmitting the inquiry request via the network server and displaying a form containing the search result.

Art Unit: 2162

Group II: A keyword searching and accessing using a browser.

Group III: A form selected by a user and processing the issuing form via a document processing center.

Group IV. A network server for transmitting the request to a document processing center, a request for inquiring, browsing, issuing or reading a document in the use of a browser.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III and IV, the search required for Group II is not required for Groups I, III and IV, the search required for Group III is not required for Groups I, II and IV and the search required for Group IV is not required for Groups I, II and III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 09/993,786 Page 4

Art Unit: 2162

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
